Date: 06 February 2025

COMM'S SUBJECT :
In reference to Eagle Eye 25-2 please find below information related only to P&W specific drawings.

WEBINAR: CMM Inspection Common Failure Modes & Prevention – 2025 Series

BACKGROUND
Coordinate Measuring Machines (CMM) are a highly accurate and flexible inspection method used on a wide array of products and feature types for verifying Dimensional characteristics throughout PW and the supply chain. They are also the leading driver of detection related issues relating to Dimensional Inspection escapes for a wide variety of reasons. PW-QA 6056 was created to help high-light best practices and recommendations for the CMM inspection of PW product and improve the discipline health of CMM inspection. This webinar course will go over the common errors in CMM Inspection that result in Escapes and false acceptance/rejection of product, PW-QA 6056 and ways to help prevent them from happening and improve CMM inspection.

WHO SHOULD ATTEND
Those who are involved in the use of CMM's to inspect hardware (CMM Inspectors, CMM Programmers, QE's, ME's).

WHAT WILL BE COVERED
This one-hour webinar will cover Escape history relating to Dimensional Inspection detection failures, common CMM inspection detection failure modes, overview of PW-QA 6056 and recommended best-practices. The training will be based on the PW-QA 6056 specification.

HOW TO JOIN THE SESSIONS
Register in advance for the webinars that best suit your availability with the applicable registration link below.
March 18, 2025 at 4:00pm (EST) with the Zoom Meeting Information link below:
