

Dear Suppliers,

With regard to recent escape we would like you to verify supplied to PWR parts drawings and pay special attention to notes including „except” word in it.

Interpretation concerning drawing notes with „except” word:

- means: exception – additional or changed requirement
- does not mean: exclusion of the requirement.

**Example note:**

MATL: CPW 41 OR AMS 4928 TI ALLOY EXCEPT  
MICROSTRUCTURE PER SPEC CPW 289-1.

Part is to be manufactured per CPW 41 or AMS 4928 material requirements, with exception that microstructure should meet CPW 289-1 spec requirements.

**Clarification:**

Part material requirements are per CPW 41 ( which refers to microstructure per CPW289-1) or per AMS4928 (which has different microstructure requirements).

However “except” in this case dictates that microstructure per CPW289-1 requirements should be met for both materials (AMS4928 and CPW 41).

Please review and forward this communication to every employee concerned with realization of product for Pratt & Whitney Rzeszów S.A.
