## Quality Cardinal Rules – Data Integrity

Dear Suppliers, WSK Quality Policy and our customers commit us to deliver dependable products and assures that safety is the most important. The same rules apply also to You.

One of the Quality Cardinal Rules is **Data Integrity**.

Falsification of quality records has impact not only on products but also on flight safety. Violation of Data Integrity rules is not only non-ethical behavior but also may and will cause serious consequences such as additional audits, controls, material testing etc. This will cause additional costs incurred by the Supplier.

In addition it will cause a serious harm to company's reputation, dissatisfaction of the customers. Violation can also be punishable by imprisonment and fines.

### Please notice!!!

- Never falsify records - ever.
- Always enter complete and accurate data/observations on any manufacturing, maintenance, or quality records.
- Never make a false or inaccurate statement or data entry regarding product quality or work performed.
- Never provide false statements or data to anyone whose duty it is to enter and document company records.
