

„Solid verification of client’s quality requirements is fundamental for manufacturing of conforming product”

Dear Suppliers,

In this issue of quality bulletin, we would like to undertake the subject of verification of client’s requirements, which you are required to fulfill due to purchase order/schedule agreement.

Before you propose your offer to your client (purchase order accepted, contract is signed etc.) it is crucial to ascertain that requirement placed by the client are known and are to be fulfilled in order to deliver conforming product/service.

Quality requirement from WSK PZL Rzeszów to Suppliers are listed in quality instructions which are mentioned on purchase order (instructions #112, #119, #150 etc.), as well as in other specifications for End User (ASQR-01, SQOP-01-01, RSI, HSM17, PW-QA 6088, SPD, QAD, RCC etc.) End User must be mentioned on each purchase order (PWA, PWC, HS, Avio). Requirement mentioned above are to be called out by purchase order.

What is expected from the Suppliers in subject of requirements verification:

- Special/additional requirements for the product/service must be clearly described for the Supplier – in case of any doubts Supplier is obligated to contact WSK for clarification. For that purpose Supplier can use SRFI form (Supplier Request for Information) – attachment #1 to Instruction #150.
- Supplier’s Quality Department should take part in process of verification of purchase order.
- Supplier is obligated to get hold of all updated specifications, instructions and procedures which are required by purchase order.
- Supplier is obligated to implement Client’s requirements into Supplier’s processes, procedures and acquaint the personnel with the requirements.
- Verification of the purchase orders must be documented.

Client’s requirements must be known and understood by the Supplier, in order to supply product/service which meet Client’s expectations.
