

Quality Bulletin

GO BEYOND

Published by Supplier Quality Assurance Department

Dear Suppliers,

In reference to Eagle Eye 20-16 and Quality Bulletin no 93 we ask you to confirm results of your part marking review for P&W end use within 5 working days. Attached is checklist that need to be filled out and send back to received bulletin email address.

Part Marking MFR Cage Code per PWA 310 Revision BJ, Paragraph 5.2.1.8

Paragraph 5.2.1.8 states: *“The CAGE code of the manufacturing activity, prefixed by the letters MFR and a hyphen (-) or dash, shall be marked directly below the P&W CAGE code where space permits”.*

Above paragraphs define correct sequence of Supplier Code and Cage Code Marking. Producer Cage Code shall be marked directly below P&W Cage Code and Supplier Code shall be marked below both Cage Codes

Clarification of statement „the CAGE code of the manufacturing activity”.

„Manufacturing activity” shall be considered as company who actually produces given part. In a case when Supplier produces and deliveries parts to P&W Poland, parts shall be marked with Supplier Cage Code, unless otherwise stated on PO.

Two Supplier Codes part marking per PWA 310 Revision BJ, Paragraph 5.2.1.3

When purchase order requires additional P&W Poland Supplier Code to be marked on parts e.g. 40342 for PWR, 40800 for PWK, 42439 for PWT then as first need to be marked P&W Poland company Supplier Code (e.g. 40342), next symbol “/” without spaces, next Supplier Code given by P&W Poland.

Example of correct part marking in relation to above requirements, in a case where there is sufficient space:

77445-12345 A
MFR-ABCD01
54321/67890

Where: 77445 – P&W Cage Code
12345 A – Part number and revision
MFR-ABCD01 – Producer (Supplier) Cage Code
54321 – P&W Poland Supplier Code
67890 – Supplier Code

PWA310 Appendix A (figure 6 and 7) provides examples of suitable and sufficient space.

Parts with non-conforming part Marking must be reported via eZN.

In a case of any questions please send your reply to received bulletin email address.
