# QUALITY BULLETIN

Published by Pratt & Whitney Company in Poland

## Dear Suppliers,

Raytheon Technologies has published revision 12 of ASQR-01, "Supplier Quality System Requirements" including a major document structure change separating the quality system requirements for Collins Aviation and for Pratt & Whitney (P&W and P&WC). For Pratt & Whitney, the major change is incorporating the *SAE AS13100™ AESQ Quality Management System Requirements for Aero Engine Design and Production Organizations* standard published by the Aerospace Engine Supplier Quality (AESQ) Strategy Group for all Pratt & Whitney suppliers (with an implementation date of January 1, 2023).

As Pratt & Whitney's partner and key contributor in the success of building Dependable Engines, we have been offering training / Q&A webcasts in 2022 for all supplier Quality Managers (and their staff) to participate in (3 rounds completed already). The intent of the program is to ensure suppliers are aware and on track with meeting the new AS13100 specification for the January 1st, 2023 deadline. As our partners in this, we would like to equip every Quality Manager with the resources and guidance to ensure their QMS remains in compliance.

Remaining sessions in 2022 are as scheduled in Quality Bulletin 111. Specific links to the individual sessions will be sent out separately via email.

You can also access AESQ AS13100 information at: <https://aesq.sae-itc.com/as13100-resources>

For any questions or concerns related to AS13100 or ASQR-01 rev 12, please contact:

P&WC: Jim Wilson ([jim.wilson@prattwhitney.com](mailto:jim.wilson@prattwhitney.com))

P&W: Earl Capozzi ([earl.capozzi@prattwhitney.com](mailto:earl.capozzi@prattwhitney.com))

Pete Teti ([pete.teti@prattwhitney.com](mailto:pete.teti@prattwhitney.com))

In case of any questions please send your reply to received Bulletin email address.

SQA Group of P&W Poland Company.
